

Daniel Wallingford

UX Engineer | Designer/Builder

daniel.wallingford@gmail.com

With a design background, I work at the intersection of design and development, taking concepts and high-fidelity mockups and turning them into polished, functional websites and applications. My focus is on creating experiences that not only look great but work seamlessly across all device sizes.

Experience

Intermountain Health | *UX Engineer*

2013 - present

Helped continuously improve and modernize Intermountain's public website, working across design, development, and analyst teams to enhance user experience and adopt new technologies.

Utah Retirement Systems | *Web Designer/ Front End Developer*

2010 - 2013

Initiated the redesign of a retirement application, converting it from desktop-only to a fully responsive, cross-device user experience.

Ultradent Products, Inc. | *Web Design Intern*

Fall of 2010

Collaborated with Graphic Artists and Brand Managers in creating designs for web layouts, email blasts, and banners.

Education

MAS ICT, Emphasis in Web Design and Development

University of Denver (2010 - 2012)

BS, Architectural Studies

University of Utah (2006 - 2009)

AA Generals

Snow College (2002 - 2006)

Skills

React, Typescript, SCSS, Git, Figma, Sitecore, Wordpress, Microsoft Teams, Responsive Design, Accessibility, Site Performance, Visual Studio Code.
